

Šaľa, 03. November 2015

During the period of our joint work, our company and TINIA COMPANY s.r.o., have had a very successful cooperation. For the purposes of our company, they produced with their subcontractors, special kind of containers in the Republic of Serbia. We are very satisfied with the quality of delivered products, meeting deadlines, and we are looking forward to continuing our good cooperation.

In our future project at Ammonia plant, in the chemical industry DUSLO, in Sala, TINIA COMPANY s.r.o., could participate as subcontractor, and could be the holder of activities related to the prefabrication of pipelines and pipelines support system.

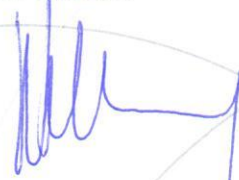

We know that the owner of TINIA COMPANY s.r.o., founded the company in the Republic of Serbia, and our intention is to continue to cooperate with this company in future projects.

We look forward to continuing our cooperation.

Kind regards
