Tinia Company S.R.O.

Slovakia / Serbia

Bietigheim, 06.11.2015

Intended Cooperation

Dear Mr. Plavsic,

As desired we gladly confirm as follows:

We have asserted, that TINIA COMPANY s.r.o. is a very professional and experienced company in the field of water treatment.

In 2015 we have contracted TINIA for a large and demanding construction work of an industrial waste water treatment plant for a new starch factory of Südzucker AG in Zeitz, Germany. TINIA made for us all local installation work including pipework, mainly based on stainless steel materials. TINIA has completed the work in a high quality workmanship and the company successfully met the contractual deadlines. We have been well satisfied with the entire result of work.

In consequence we are interested to continue cooperation on further projects according to our actual new projects.

We were particularly interested in the information that TINIA has opened the company TINIA COMPANY d.o.o. in Serbia for prefabrication of pipelines and other components for water treatment plants. In this regard we have scheduled to award prefabrication works for our upcoming new projects to TINIA COMPANY d.o.o. in order to progress for a long-lasting business relation.

In this spirit we are looking forward to increase our cooperation.

Best regards

Stefan Köppl
